## WHAT IS VOLTRIM FLIPCRAFT?

Voltrim FlipCraft converts PDFs, image collections, and Word documents into beautiful interactive flipbooks with realistic 3D page-turn animations, sounds, a progress bar, zoom controls, and fullscreen mode. The output is a protected Windows executable (.exe) that your audience can open instantly — no browser, no internet, no installation required on their end.

## EDITIONS

**Basic** — Creates an interactive flipbook viewer executable from PDF files. Supports PDF creation mode with adjustable quality settings.

**Pro** — All Basic features plus:

- Image Album mode (from JPG/PNG/WEBP image folders)
- Word Document mode (.docx/.doc via Microsoft Word or LibreOffice)
- Multi-Document Merge mode (combine PDFs + Word docs)
- Built-in content encryption — each flipbook is unique and protected

## CONTENT PROTECTION (Pro edition)

Every flipbook created by the Pro edition produces two files:

[Title].exe The viewer application (contains the encryption key)  
[Title].dat The encrypted flipbook content

The .dat file is encrypted with a unique per-flipbook key and is unreadable without its matching .exe. Deliver both files together to your customers.

## SYSTEM REQUIREMENTS

|                  |                                                          |
|------------------|----------------------------------------------------------|
| Operating System | Windows 10 or Windows 11 (64-bit)                        |
| RAM              | 2 GB minimum, 4 GB recommended                           |
| Disk Space       | 200 MB                                                   |
| Internet         | Required on first run only (to download Poppler, ~25 MB) |

Pro edition also requires .NET Framework 4.5 or later (pre-installed on all modern Windows PCs).

Word Document mode requires Microsoft Word or LibreOffice (free download from [libreoffice.org](https://libreoffice.org)) — Pro edition only.

## QUICK START

1. Launch Voltrim FlipCraft (Basic or Pro)
2. On first launch, the Poppler PDF engine downloads automatically (~25 MB)
3. Select your creation mode (PDF, Image Album, Word Document, or Merge)
4. Choose your source file or folder
5. Choose image quality (Standard 150 DPI recommended for most documents)
6. Click Create Flipbook
7. When complete, click Open Folder to find your output files
8. Double-click the flipbook .exe to launch it

## KEYBOARD SHORTCUTS (inside the flipbook viewer)

|                          |                      |
|--------------------------|----------------------|
| Arrow Right / Arrow Left | Next / Previous page |
| F                        | Toggle fullscreen    |
| M                        | Toggle sound mute    |
| + / -                    | Zoom in / out        |

## CHECK UPDATES

The Check Updates button downloads and installs the latest version of Poppler, the PDF rendering engine. Internet connection required.

## UNINSTALLING

Use Windows Settings → Apps → Voltrim FlipCraft → Uninstall.  
Your generated flipbooks are NOT deleted during uninstallation.

## LICENCE & LEGAL

See docs\EULA.txt for full licence terms.

See docs\THIRD-PARTY-NOTICES.txt for open-source component credits.

See docs\PRIVACY-POLICY.txt for privacy information.
