

INSTALLATION GUIDE

Voltrim FlipCraft — Installation Guide

Copyright © 2026 Voltrim Creative Minds

System Requirements

OS	Windows 10 (version 1903 or later) or Windows 11 (64-bit)
RAM	2 GB minimum, 4 GB recommended
Disk	200 MB free space
Internet	Required on first launch only (Poppler download, ~25 MB)

- Basic edition: No additional software required
 - Pro edition: WebView2 Runtime (pre-installed on Windows 10/11)
 - Word Doc mode: Microsoft Word or LibreOffice (free) — Pro edition only
-

Installing Voltrim FlipCraft

1. Download the installer:
 - `VoltrimFlipCraftBasic-Setup-1.0.0.exe` (Basic edition)
 - `VoltrimFlipCraftPro-Setup-1.0.0.exe` (Pro edition)
2. Double-click the installer file.
3. If Windows SmartScreen shows a warning:
 - Click “More info”
 - Click “Run anyway”

This warning appears for new software without a code-signing certificate. Voltrim FlipCraft is safe to install.

4. Follow the on-screen installation steps:
 - Read the Welcome screen and click Next
 - Review and accept the End User Licence Agreement
 - Choose whether to create a Desktop shortcut
 - Click Install
 5. Click Finish. Voltrim FlipCraft launches automatically.
-

First Launch — Poppler Download

On first launch, Voltrim FlipCraft automatically downloads the Poppler PDF rendering engine (~25 MB) from GitHub. This is a one-time download.

Requirements:

- Active internet connection during first launch only
- Approximately 1–2 minutes depending on your connection speed

If the download fails:

1. Check your internet connection
 2. Ensure your firewall or antivirus is not blocking the application
 3. Try launching as Administrator (right-click → Run as administrator)
 4. Manual install: download from <https://github.com/oschwartz10612/poppler-windows>
Extract and copy the Library\bin folder contents into:
C:\Program Files\VoltrimFlipCraftBasic\poppler\ (Basic)
C:\Program Files\VoltrimFlipCraftPro\poppler\ (Pro)
-

First Flipbook — WebView2 Tools (Pro edition only)

The Pro edition compiles a native viewer executable (.exe) for each flipbook using .NET Framework's csc.exe compiler, which is pre-installed on all modern Windows PCs.

On first flipbook creation, the app also downloads Microsoft WebView2 display libraries (~4 MB) from NuGet. This is a one-time download stored in:

C:\Users\[YourName]\AppData\Roaming\VoltrimFlipCraftBasic\tools\

After this one-time setup, all flipbook creation works completely offline.

Understanding Your Flipbook Output (Pro edition)

Each flipbook you create produces two files in the output folder:

[Title].exe The viewer application. Contains the decryption key.
[Title].dat The encrypted flipbook content.

IMPORTANT: Both files must stay in the same folder at all times. When delivering flipbooks to others, always send both files together.

The viewer decrypts the .dat content into a temporary folder at runtime and deletes it automatically when the viewer is closed.

Silent / Enterprise Installation

The installer supports silent installation for enterprise deployment:

```
VoltrimFlipCraftBasic-Setup-1.0.0.exe /SILENT
VoltrimFlipCraftBasic-Setup-1.0.0.exe /VERYSILENT /SUPPRESSMSGBOXES
VoltrimFlipCraftPro-Setup-1.0.0.exe /SILENT
VoltrimFlipCraftPro-Setup-1.0.0.exe /VERYSILENT /SUPPRESSMSGBOXES
```

Uninstalling

Method 1: Windows Settings

Settings → Apps → Voltrim FlipCraft → Uninstall

Method 2: Control Panel

Control Panel → Programs → Programs and Features → Voltrim FlipCraft → Uninstall

Method 3: Start Menu

Start → Voltrim FlipCraft → Uninstall Voltrim FlipCraft

Note: Your generated flipbook files are NOT deleted during uninstallation. Only the application itself is removed.

Upgrading

To upgrade from an earlier version:

1. Download and run the new installer
 2. The installer will automatically remove the old version first
 3. Your settings and generated flipbooks are preserved
-

Troubleshooting

Problem: “Windows protected your PC” SmartScreen warning

Solution: Click “More info” then “Run anyway”. Normal for new software without a code-signing certificate. The application is safe.

Problem: Poppler fails to download on first launch

Solution: Temporarily disable antivirus, then relaunch. Or install Poppler manually using the instructions in the First Launch section above.

Problem: “csc.exe not found” error during flipbook creation (Pro)

Solution: Ensure .NET Framework 4.5 or later is installed.

Download from: <https://dotnet.microsoft.com/en-us/download/dotnet-framework>

Problem: WebView2 DLLs fail to download (Pro edition, first flipbook)

Solution: Check your internet connection. Try running as Administrator. Ensure firewall is not blocking outbound HTTPS.

Problem: Generated .exe shows error “Content file not found: [Title].dat”

Solution: The .dat file is missing or has been moved. Ensure both [Title].exe and [Title].dat are in the same folder, then relaunch the .exe.

Problem: Generated .exe fails to open flipbook

Solution: Update WebView2 Runtime via Windows Update, or download from:

<https://developer.microsoft.com/en-us/microsoft-edge/webview2/>
